

Index

1:1 resonance, 155

A

absolute instability, 76
accretive operator, 334, 335, 339
adiabatic evolution, 343–347
adiabatic invariant, 306, 401–408
affine constraint, 352–353, 358–359,
365, 367, 369
Airy function, 90, 234
artificial materials, 13
avoided crossing, 156

B

baroclinic instability, 225
Beck's column, 71
Beltrami equilibrium, 410, 412–414
Benjamin-Feir instability, 165, 227,
228
Bespalov-Talanov instability, 165
Birkhoff normal form, 98
Bloch band, 112, 122, 129
Bloch wave, 184
Bohr-Sommerfeld quantization,
88, 99
Boltzmann distribution, 405, 407

Bose-Einstein condensate, 111
Breit-Wigner peaks, 16
bubble of instability, 156
buckling, 2–4

C

Caldeira-Leggett model, 301, 303,
304
canonical transformation, 253–255,
259, 262, 265, 271
centralizer unfolding, 159–160,
162–164
characteristic polynomial, 45, 48, 49,
52, 55, 57, 192, 361, 363
chemical potential, 114, 116, 122,
130, 407
Chen R., 352
complex WKB-method, 100
complexification, 57
compliant panel, 68
constraint's curvature, 4–7
continuum Hamiltonian Hopf
bifurcation, 247, 283
convective instability, 76, 77
cosmological repulsion term, 260
Coulomb friction, 8–12

D

destabilizing effect of damping, 81
 discrete spectrum, 271, 300, 378
 dissipation-enhanced modulation
 instability, 169
 dissipation-induced instabilities,
 156, 168

E

eigencurve, 183, 197
 eigenvalue branch, 156, 179, 181,
 183, 186, 188, 191
 eigenvalue counting, 304
 eigenvalue optimization, 362, 363,
 367, 369
 elastic structure, 1–13
 embedded mode, 274, 278, 292,
 293, 305
 energy harvesting, 2, 68, 79–81
 energy-Casimir method, 311, 312,
 314, 317, 318, 323
 essential spectrum, 17, 185, 344,
 378, 382, 386–390
 Evans function, 182, 380, 382
 Evans matrix, 381
 exponential decay, 97, 101, 232,
 331–347, 381

F

feedback control, 351, 352
 Floquet exponent, 94, 95, 107
 Floquet theory, 184
 fluid-conveying pipe, 68, 70, 72, 73,
 76, 77, 80, 81
 flutter instability, 1, 8, 9, 12, 13,
 75, 156
 fluttering flag, 68
 follower force, 8, 11, 67, 71

G

Gamow G., 17
 Ginzburg-Landau equation, 76, 77,
 223, 231–232
 global stability, 74–81
 global stability analysis, 68
 Grad-Shafranov equation, 320
 graphical Krein index, 181
 Gross-Pitaevskii equation, 113

H

Hörmander L., 17, 24
 Hamilton-Jacobi equation, 101–103
 Hamiltonian field theory, 264
 Hamiltonian flow, 15, 34, 37, 99
 Hamiltonian Hopf bifurcation, 44,
 47–50, 151, 208, 247, 283
 Hamiltonian symmetry, 182, 183,
 378, 383, 384, 391
 Hamiltonian vector field, 19, 41,
 42, 65
 heat bath, 283, 301–303
 helicity, 409–414
 Hermite polynomial, 19
 homoclinic orbit, 18
 Hopf bifurcation, 75, 155, 157,
 161, 225
 hybrid Grad-Shafranov equation,
 320, 323
 hydrodynamic stability, 223,
 228, 231

I

imperfect velocity-impulse
 diagram, 214
 indefinite inner product, 178,
 179, 184

index theory, 177, 179, 186
 inertial wave, 139
 instanton, 86, 88, 89, 91, 93–97,
 102, 104–107
 ion beam, 256–259
 IVI diagram, 204–207, 216–218

J

Jeans instability, 259, 261
 Jordan block, 156, 157, 171, 191,
 331, 332, 367, 371, 372

K

KdV equation, 183, 380, 396
 Kelvin wave, 145–147
 Kelvin-Helmholtz instability, 207
 Kelvin-Tait-Chetaev theorem, 156
 Kramers-Fokker-Planck operator,
 338–343
 Krein index, 180, 183, 192, 379
 oscillation theorem, 186
 sign, 179–182
 signature, 179–182
 Kulikovskii A. G., 77
 criterion, 76–78

L

Lagrange multiplier, 252, 360, 395,
 404, 407
 plane, 52
 Landau-Lifshits splitting
 formula, 87–92
 libration, 85–107
 linearization, 21, 41, 43, 44, 86, 114,
 165–167, 242, 249, 252, 267, 286,
 336, 412
 Liouville's theorem, 407
 local stability, 72–74
 localized mode, 111
 Lyapunov stability, 380, 381

M

MacKay's cone, 156
 magnetic field, 85–107
 magnetohydrodynamics, 146, 311,
 401
 Markov chain, 351, 369–371
 Maslov canonical operator, 102
 Maslov index, 382
 matrix family, 361, 371
 Maupertuis-Jacobi variational
 principle, 95
 Maxwell-Vlasov system, 312, 325
 Maxwellian distribution, 268–270,
 291, 293, 295, 296, 298, 305, 338
 microlocal analysis, 17, 23–24
 microlocal cauchy problem, 15, 17,
 18, 24–28
 modulation instability, 164–172
 monic polynomial, 351, 352, 353,
 357–359
 MSTW instability, 139, 141, 151
 multifluid plasma, 256
 multiple root, 45, 352, 358, 367

N

negative energy mode, 141, 156, 204,
 208, 254, 257, 259–261, 276–278,
 287, 301, 416
 negative energy oscillator, 283,
 301–303
 wave, 68, 72, 80,
 81, 139
 non-conservative positional force,
 169, 172
 non-self-adjoint operator, 28
 noncanonical hamiltonian system,
 278, 283–286, 308, 323, 401,
 403–405
 noncanonical poisson bracket, 250,
 285, 316

non-derogatory eigenvalue, 365, 367, 370, 371
 nonlinear Schrödinger equation, 113, 165, 182, 277, 231
 wave, 177, 179, 185, 229, 377–397
 normal operator, 332

O

operator pencil, 178–182, 185, 186, 191, 193, 194, 381, 397
 optical lattice, 111
 waveguide, 111
 optimization, 343, 351–372
 Orr-Sommerfeld equation, 232, 233–234
 Oseen vortex, 336

P

parallel shear flow, 223–244
 parametric resonance, 139
 pattern formation, 284, 306
 penrose plot, 268–270, 291–296, 304
 periodic potential, 111, 120
 plasma physics, 68, 248, 254, 284, 306, 311, 312, 314
 point spectrum, 177, 179, 181, 182, 185, 188, 268, 269
 poisson bracket, 42–44, 249, 250, 253, 254, 257, 258, 264, 265, 267, 272, 285, 287, 290, 313, 316, 317, 323–325, 401, 403, 404, 406, 407
 pole placement, 362, 367
 pontryagin space, 381, 387
 positive energy mode, 204–208, 212–214, 216–218, 259, 260, 276
 postcritical behavior, 1, 5, 13
 propagation of singularities, 24
 pseudospectrum, 333, 334, 347, 372
 PT-symmetry, 339, 340, 341

Q

quantum resonance, 16, 343–345
 quasimode, 90

R

resolvent, 17, 28, 29, 332–334, 336, 340, 341, 347, 393
 root abscissa, 355–357
 root radius, 353–354
 root radius optimization, 365, 367
 rossby wave, 236, 241, 244
 rotating oscillator, 169

S

schrödinger equation, 15, 17, 19, 27, 31, 100, 101, 103, 113, 165, 182, 277, 231
 schur stable polynomial, 358
 sectorial operator, 334, 347
 self-focusing, 111
 semi-classical approximation, 101, 102
 semigroup, 331–347
 sign exchange bifurcation, 41–65
 singular perturbation, 401–417
 slender structure, 68
 sobolev space, 288, 378
 spectral abscissa, 351, 361–363, 371, 372
 spectral operator, 288
 spectral problem, 103, 104, 311, 378, 382–386, 391–397
 spectral radius, 351, 361–372
 spectral stability, 337–397
 stability domain, 160–162
 steady state bifurcation, 248
 structural damping, 71
 structural stability, 285–287, 294–296
 Sturm-Liouville problem, 69, 184–186

subcritical instability, 224, 225, 242
 subgradient, 360
 symplectic matrix, 41, 44, 46, 47, 49,
 50, 396, 406
 symplectic plane, 64, 65
 symplectic sign, 64–65
 symplectic signature, 179
 symplectic switch twist bifurcation,
 50

T

tearing-mode instability, 414–416
 tensile dead loading, 2, 3, 13
 tension, 1–5, 81
 tokamak, 322
 Tollmien-Schlichting instability, 234
 transition to turbulence, 225
 transversality condition, 93
 tunneling, 85–107

V

Vakhitov-Kolokolov criterion, 182
 veering, 156
 velocity-impulse diagram, 206, 210,
 212, 214, 215
 versal normal form, 46, 50
 versality, 41
 viscous critical layer, 233
 viscous damping, 67, 71, 73, 77, 79

Vlasov equation, 249, 272, 274, 276,
 299, 302, 312, 320, 323
 Vlasov-Jeans instability, 305
 Vlasov-Poisson equation, 263, 266,
 268, 276, 284, 285, 289, 308
 Vlasov-Poisson system,
 vorticity, 112, 141, 143, 144, 145,
 204–209, 212, 229, 232, 234–236,
 240, 242, 315, 320, 402

W

waterbag model, 249, 263, 271–274,
 276, 278
 wave action, 147, 148, 150
 equation, 68–71, 74, 80, 167
 packet, 226–232
 Weber function, 19
 Weyl quantization, 17, 23
 Whitney stratification, 162
 Whitney umbrella singularity, 157,
 162, 167, 169, 171
 Witten Laplacian, 339
 WKB, 17

Z

Ziegler's pendulum, 8–12
 Ziegler-Bottema destabilization
 paradox, 157
